## Calibration

**ISO/IEC 17025** – General requirement for the competence of testing and calibration per ISO/IEC 17025 used by testing and calibration laboratories.

ISO/IEC 17025 Management Requirements and Technical Requirements apply.

1. Management requirements are for the [quality management system](#) within the laboratory.
2. Technical requirements include factors which determine the correctness and reliability of the tests and calibrations performed in the laboratory.

Laboratories shall have implemented an ISO/IEC 17025 quality system aimed at improving their ability to consistently produce valid results. Accreditation shall be a formal recognition of a demonstration competence. The prerequisite for an accredited laboratory is to have a documented quality management system. The contents of the quality manual shall follow the outline of the ISO/IEC 17025 standard.

**ANSI/NCSL Z540-1-1994** - Seller shall certify calibration per ANSI/NCSL Z540-1-1994.
